HE SERIES "DCP" 4-POST **HYDRAULIC REGENERATIVE TRIM PRESS**

QUALITY PRESSES WITH LONGEVITY!
WE HAVE BEEN MANUFACTURING NEW TRIM PRESSES SINCE 1968

Features HE Series

- Platen machined from 1025 material
- Shut height adapters available
- 4-braid hydraulic hoses
- **Dual casting ejection cylinders mounted in moving platen for auto ejection of castings**
- Safe, fully powered regenerative circuit
- Oil temperature & sight level gauges
- Cartridge valving manifold mounted
- Manual speed control
- Air operated safety ratchet and palm buttons
- Stroke adj. Top & bottom
- Bolt on legs for shipping & rigging ease
- Ram speed 1 ft per second
- AB 500 processor
- Anti-drift cylinder seals.
- 5/8" t-slotted platens
- Solenoid indicator lights
- TEFC energy efficient pump motors
- Vickers double vane pump
- Chrome alloy tie bars
- Chrome plated trim cylinder piston rod
- One point lubrication
